

CREATED FOR COMPANIES

VR9 VIRTUAL REALITY to increase your sales

We are one of the first companies in Italy to have proposed **VIRTUAL REALITY** as a tool to increase sales.

We start approaching this technology in 2011 with Sany 5D companies, multimedia products leader all over the world.

But what did we create? A one-of-a-kind product that will allow you and your customers to immerse yourself in **VIRTUAL REALITY** , whether it's surfing , visiting a property or a dream travel.

But what is VR9 VIRTUAL REALITY? Technically it's about a realistic and immersive reproduction of a three-dimensional environment in 360°, made using high-tech cameras recording in 360° format, and the use of dedicated hardware (VR9 headset) and software , all under the supervision of a team of engineers.

Our service and the VR9 are perfect for all the companies that want to increase sales , with the possibility of customized VR9 headset and videos.

The VR9 headset that we sell has been adapted with dedicated software , to increase flow of the high resolution images made with high-tech cameras 360° by professionals.

We make the videos and load them in to the VR9 headset in just 24 hrs, so you will be able to watch and test the results immediately, with no waste of time.

We do not make virtual photo tour !!! But we realize a turnkey service using our VR9 headset to integrate immersive experiences of the 360° videos , as in the reality.

But why is our VR9 product so important to sell certain types of products?

With the VR9 you can reproduce visual experiences and real sensations of the location, and you can feel the feeling of trying the product you are about to buy whether it's a properties or a dream beach in French Polynesia.

This means orienting to the best to buying, VR9 is perfect for all the companies that need an emotional sale.

Where it's not possible to test a product or to see it , VR9 virtual reality will make it possible and will make you more competitive on market.

VR9 virtual reality to increase sales

We create the service and adapted VR9 with state-of-the-art technologies we are proud of and licensees.

We can move everywhere and we can sell the product with regular licence, we offer the TURNKEY service in 24hrs whether in the production and sale, with consultancy for use and guarantee.
